A soundwalk is...
...for everyone’s enjoyment and learning
...opening our ears to every sound in the environment
...a rare opportunity for listening in a social group

A soundscape is...
...the experience of sound in your landscape
...always active and changing
...at times subtly affective and informative,
...but often unnoticed
...a natural resource, or a design made in sound

Chicago Park District’s Night Out in the Parks soundwalks series explore our relationship the sounds around us. Discover the sounds of the city’s life: people, birds, insects, mammals, amphibians, and fish. Become a citizen scientist.
